

Inspiring Trust

We've put a 1000 watt smile on Mumbai's pride and joy.

Bajaj Electricals, one of India's foremost infrastructure and lighting solutions company, is proud to be the illumination and power distribution partner of the Bandra Worli Sea Link Project.

The Sea Link will witness India's first major installation using Glass Fibre Reinforced Polymer (GRP) street lighting poles to combat the highly corrosive, saline atmosphere. The flood-lit cable stayed bridge makes it a breath-taking sight during night time.

Millions of commuters will save precious time while travelling on this engineering marvel. And we will be lighting their way.
